

Amendments to the Specification:

Please replace the paragraph at page 67, from line 5 through line 10, with the following paragraph:

-- Cinnamic acid chloride (52.5 mg, 1 eq.) was added to a solution of azepan-4-yl-(6-methoxyquinolin-4-yl-methyl)amine (90 mg, 0.32 mmol) in THF/DCE. The reaction mixture was stirred at room temperature for 3 hours, concentrated, and purified by chromatography on silica gel (DCM/MeOH 9:1 (+1% NH_4OH)). --

Please replace the paragraph at page 91, from line 1 through line 12, with the following paragraph:

-- 60.b) 2-(4-Benzyl-morpholin-(2RS)-yl)-methylamine

A solution of 2-Azidomethyl-4-benzyl-morpholine (4.23 g, 18 mmol) and triphenylphosphine (9.47 g, 36 mmol) in THF/water (10/1, 100 ml) was heated overnight at 60°C. The reaction mixture was concentrated and the residue was taken up in 3N HCl (200 ml) and EtOAc (200 ml). The aqueous phase was extracted with EtOAc (4*). The aqueous phase was adjusted to pH 12 using NaOH and extracted with EtOAc (2 x 200 ml), dried over MgSO_4 and concentrated.--
